## Summer 2020

During June, receive a FREE ICE CREAM treat, string cheese, or Go-Gurt when you stop in at our Rio Creek or Luxemburg office to do any business. June Dairy Month is a great opportunity to thank all dairy farmers, who provide us with great tasting milk, cheese, butter, yogurt, ice cream, and so many other delicious dairy products.

The deadline to return unopened eligible corn & soybeans is **June 12<sup>th</sup>**. PLEASE return any seed you will not need **AS SOON AS POSSIBLE!** Another customer may need it.

If you are going to plant any emergency forage, we have the seed you need...oats, peas, barley, BMR sorghum sudangrass, non-BMR sorghum sudangrass, spring wheat and several grass blends. We will also have different cover crop options available.

We will continue to stock a wide selection of wildlife plot seeds all season!

Bisect insecticide does a great job of controlling mosquitos, ants, spiders, & many other insects.

We are stocked up on your fly control needs...Tempo Concentrate, Quick Bayt, and fly aerosols.

RCFM's YieldMAXX Hayland fertilizer blend, straight potash, or a custom potash blend, applied on your hay fields will increase tonnage and the longevity of your stands!

Our crop scouting team can go out to your fields to gather samples for PSNT testing to take the guesswork out of how much nitrogen your crop still needs.

360 Y-DROP liquid nitrogen applications are being offered for the second year. This special application can be done well after other types of applications are no longer an option. Studies have shown that this is the most cost-effective/yield-increasing time to apply nitrogen. We are also continuing to offer row crop dry urea applications.

For the do-it-yourselfers, rent our 12-row spiker for liquid nitrogen and narrow track/row crop pull-type fertilizer spreaders for dry urea applications.

PLEASE call us NOW, if your corn is out of the ground and you want us to do your post-emergence spraying. Advance notice helps us to efficiently plan for taking care of it at the correct stage!

Wheat Vomitoxin is caused by the disease Fusarium Head Blight. Plants are generally very susceptible to this when weather conditions are extremely wet throughout the heading out stage. Fusarium Head Blight can be controlled with our YieldSHIELD-Wheat program including Prosaro. Besides lowering Vomitoxin levels, Prosaro also increases yield and test weight.

Participating in RCFM's YieldSHIELD programs will also earn you up to a \$0.10/bushel premium in addition to any premiums earned for low VOM levels during harvest! Rio Creek Feed Mill also offers YieldSHIELD programs for Oats, Oats with Alfalfa, Barley, and Soybeans. All programs offer a premium per bushel delivered during harvest.

All oats and barley fields need to be sprayed if you plan to sell or store the grain at RCFM. We cannot accept weedy oats. Additionally, we pay a premium above the market base price for heavy test weight oats!

## Summer 2020

### Check Out RCFM's Seed Plots

We invest a lot of extra effort and expense in planting and harvesting seed plots, to gain valuable information, so we can confidently recommend what seed varieties will be most likely be profitable for our customers.

**Enogen Grain Corn Plot** ½ mile west of County Road C on the south side of County Road K

**Small Grain Plot (Spring Wheat, Oats and Barley)** ¼ mile west of our Rio Creek location, on the north side of County Road K

**New! Conventional Soybean & Glyphosate-Resistant Soybean Plot** next to (east of) the Small Grain Plot (follow sign on lane)

**Enogen Corn Silage Plot** behind (north of) the Small Grain Plot (Follow sign on lane)

\*We are also conducting **Spring Wheat Trials** at three separate locations.\*

Kent Silage Supreme Inoculants protect your valuable high-moisture grains, silages, and forages. We have the dry formulation in stock and would be happy to order the liquid for you!

We also stock Hay Green buffered propionic acid in 55-gallon drums and can order smaller containers.

With the addition of a new semi-truck and feed trailer to our bulk feed truck fleet, RCFM is committed to providing you with efficient and reliable service for many years to come! Call us for a competitive price quote on fine-ground corn, canola meal, corn gluten feed, distiller's grain, soybean meal, cottonseed, or a custom-mixed feed blend.

Also, do not forget to call us to place your weekly order for our low-cost bagged feed route delivery service.

Our feed mill will be CLOSED on Friday, July 3<sup>rd</sup> in observance of Independence Day.

### **VERY IMPORTANT!**

**If you've used your gravity wagon or truck to haul any bulk treated soybean or wheat seed, make sure that it is properly washed out and free of any treated seed and/or chemical before loading it with feed or grain!** If your contaminated grain is mixed in with other grain, you are legally responsible for the expense to dispose of all affected grain!

*We thank you for your continued business,  
especially during these difficult times.  
Together, we can continue to strengthen the  
strong agricultural tradition in Wisconsin.*
